ALARM PHILOSOPHY

CONTENTS

Approval.....	5
1 Introduction.....	6
1.1 Background.....	6
2 Purpose and Use of the Alarm Philosophy.....	7
2.1 Alarm Management Lifecycle.....	7
2.2 Relation to HAZOP Studies & LOPA Reviews.....	10
2.3 Roles and responsibilities.....	11
3 Terminology & References.....	12
3.1 Definitions.....	12
3.2 Acronyms.....	16
3.3 References.....	17
3.3.1 Industry Standards and Codes.....	17
3.3.2 Company Standards and Practices.....	17
3.3.3 Other Documents & References.....	17
4 Alarm Identification.....	18
4.1 Alarm Identification Methods.....	18
4.2 Alarm Identification and Alarm MOC Process.....	19
5 Alarm Documentation and Rationalization.....	20
5.1 Alarm Rationalization Methodology.....	20
5.2 Alarm Priority Determination and Assignment.....	21
5.3 Maximum Time for Response and Correction.....	22
5.4 Alarm Limit Setting.....	22
5.5 Alarm Documentation.....	23
5.6 Alarm Classification.....	24
6 Alarm Design Principles.....	25
6.1 Alarms that Prevent Harm to Personnel and Environment.....	25
6.1.1 Flammable and Toxic Gas Detector Alarms.....	25
6.1.2 Safety Shower and Eyebath Activation alarms.....	25
6.2 Alarms for Redundant Sensors and Voting Systems.....	25
6.3 Process Optimization Alarms.....	25
6.4 Building Related Alarms.....	26
6.5 Instrument Diagnostic Alarms.....	26
6.6 External Device Health and Status Alarms.....	26
6.7 ESD Systems.....	26
6.8 Maintenance Override Switches - MOS (ESD Bypasses).....	26
6.9 Duplicate Alarms.....	26
6.10 Consequential Alarms.....	26
6.11 Deviation Alarms.....	27
6.12 Pre-Alarms and Trip (Cut-Out) Alarms.....	27
6.13 Alarm Handling for Programs.....	27
6.14 Alarms to Initiate Manual Tasks.....	27
6.15 Control System Diagnostic Alarms.....	27
6.16 Point, Interlock and Program References to Alarms.....	27
6.17 Common Alarms.....	27
7 Alarm Human Machine Interface.....	28
7.1 Role of the Operator.....	28
7.2 Responsibilities Related to and in Response to Alarms.....	29
7.3 Considerations for alarms routed to multiple operators / locations.....	29
7.4 Alarm Summary Display Characteristics and Usage.....	29

7.5	Proper Alarm Indication on Graphics	29
7.6	Annunciated Alarm Priority	30
7.7	Navigation and Alarm Response.....	30
7.8	Use of External Annunciators	30
7.9	Use of Hardwired Switches	30
8	Alarm System Implementation, Operation and Maintenance.....	31
8.1	Alarm Commissioning & Testing practices	31
8.2	Alarm Checkout practices.....	31
8.3	Alarm Initial Testing.....	31
8.4	Alarm Periodic Testing.....	31
8.5	Transfer of alarms to a non-functional Maintenance state	31
8.6	Alarm Shelving.....	31
8.7	Alarm Suppression.....	32
8.8	Alarm System Problem Detection and Resolution	32
8.9	Nuisance Alarm Handling and Resolution Work Practices	32
8.10	Alarm System Initial Training	32
8.11	Alarm System Refresher Training	32
9	Alarm System Performance Monitoring, Assessment, and Audits	33
9.1	Key Alarm Performance Indicators.....	33
9.2	Alarm performance Assessment & Audits.....	33
9.3	Alarm History Preservation	33
10	Advanced Alarm Handling	34
10.1	Advanced Alarm Handling Techniques	34
10.2	When to Consider Advanced Alarm Handling Techniques	35
10.3	Implementing Advanced Alarm Handling.....	36
11	Alarm System Management of Change	37
11.1	Alarm Changes that Require an MOC Process.....	37
11.2	The Alarm MOC Process	38
11.2.1	Requested Changes.....	38
11.2.2	Unrequested Changes.....	39
11.2.3	Change Authorization Rules.....	39
11.2.4	Change History Preservation	39
12	Control System Specific	40
12.1	<<DCS1>>.....	40
12.1.1	Alarm priorities	40
12.1.2	Annunciation of Alarms	40
12.1.3	Presentation of Alarms	40
12.1.4	Alarm and Event Logging	40
12.1.5	Access to Alarm Configurations	40
12.1.6	Specials	41
12.2	<<SCADA1>>	41
12.2.1	Alarm priorities	41
12.2.2	Annunciation of Alarms	41
12.2.3	Presentation of Alarms	41
12.2.4	Alarm and Event Logging	41
12.2.5	Access to Alarm Configurations	41
12.2.6	Specials	41
13	Appendices	42
13.1	Revision History	42
